Institute for Safe Medication Practices Canada

Consultation Services

Would you like specific advice to enhance the safety of your medication management system?

ISMP Canada Consulting Staff have extensive knowledge and understanding of the system-based causes of medication errors.

Our work is aligned with Accreditation Canada Managing Medications Standards.

Get the edge

Safety Solutions

Despite great care taken by individual practitioners, there are times when systems fail and medication errors occur.

A detailed assessment of your current medication management system can help you to understand where vulnerabilities exist and how you can work to implement safer processes.

Client feedback

"It was a pleasure to work with you and your team as you provided a very valuable review and report that will be instrumental in driving change."

Chief Executive Officer
Rural Community Hospital

"Your team made a really good impression when you were here and our safety agenda has made great strides since your visit."

Director of Quality and Risk
Specialty Hospital

"It was our good fortune that we learned of your service. I will certainly be making it a point to communicate this resource to my colleagues."

Executive Director
Community Living Agency
