

ISMP Canada Workshop

BPMH Training for Pharmacy Technicians

Understanding the hospital pharmacy technician's role in the medication reconciliation process

This one-day interactive workshop provides hospital pharmacy technicians with fundamentals of medication reconciliation (MedRec), hands-on practice in conducting a Best Possible Medication History (BPMH) interview and documenting the necessary components of a BPMH.

Program Abstract:

MedRec is a formal process to ensure communication of accurate medication information throughout a person's healthcare journey. The BPMH is the cornerstone of MedRec. This one-day interactive workshop is designed to prepare hospital pharmacy technicians to collect a BPMH in the context of the MedRec process in an acute care setting. Whether you are new to MedRec or are a seasoned MedRec technician, this workshop will give you a fresh perspective, new ideas and tools that you can start using right away in your practice.

Learning Objectives:

- On completion of this workshop, participants will be able to:
- Explain the role of MedRec as it affects patient care
 - Understand where and how MedRec takes place
 - Understand the role of the BPMH at all care transitions
 - Describe the process of completing a BPMH
 - Understand the benefits and limitations of various sources of a patient's medication information

We Will Come to You – Onsite Training
