

➤ Medication Safety Practicum for International Practitioners

ISMP Canada is pleased to announce a new **Practicum in Medication Safety for International Practitioners**. This program will be of interest to practicing healthcare providers involved in medication management who are interested in enhancing their knowledge of medication safety theory and practical applications.

Program Benefits:

ISMP Canada's Practicum for International Practitioners is designed to provide:

- Enhanced understanding of key medication safety principles and practices
- Improved skills in incident analysis and prospective risk assessment
- Increased subject matter expertise
- Opportunity to participate in the development of knowledge transfer products

Program Overview

Participants will spend 4 weeks at ISMP Canada's office in Toronto, Canada and will work directly with the Institute's safety experts. There will be one-on-one mentorship along with the opportunity to work on real world safety projects with an interdisciplinary team of pharmacists, nurses and physicians.

Tailored for You

Opportunity will be provided to work with experts on strategies to enhance medication safety practices in your home setting.

ISMP Canada will endeavor to tailor the Practicum to fit participants' key areas of interest.

” Definitely an eye-opening experience and a valuable part of training for every individual with an interest in medication safety.
